MATH

Module 5: Addition and Subtraction with Word Problems to 100. In this module students build upon their mastery of renaming place value units and extend their work with conceptual understanding of the addition and subtraction algorithms to numbers within 1,000.

Word Study

New Concepts this month include:
R-controlled sounds
and syllables
(ar, or, er, ir, ur)

Study Skills

Teach your child the value of being organized and keeping homework together.

Science

We continue with our Changes unit. Our focus is on the following:

Mixed materials that may change as the result of chemical or physical interactions. Chemical and physical properties of materials may be used to separate their mixtures.

Chemical reactions can produce new materials.

ELA

In writing we shifted from writing narrative stories to opinion and informational writing. This month we will be learning about ways in which we are persuaded to think a certain way. We will write our own opinion pieces about our favorite things. We will learn the structure of an opinion piece; stating our opinion, giving strong reasons, and providing a conclusion.
