MATH

Our next unit is Module 7: Students practice addition and subtraction skills within 100 and problem-solving skills as they learn to work with various types of units within the contexts of length, money, and data. Students represent categorical measurement data using picture graphs, bar graphs, and line plots.

Word Study

- The /ou/ sound of ou and ow
- The sound of oo, ou, ue and ew

Study Skills

Your child can access their RH Google account from home. First go to <https://drive.google.com> To log in, the students must put in their full email address and their username. It looks like rluken28@docs.rhnet.org. Their password is the same as their Chrome-book log in. The students have this memorized as it is the same one they use in class most days.

Science

In science our focus will shift from soils to plant growth and development. We'll be learning about what is inside a seed, the stages of plant growth and how bees impact plant development.

ELA

We will continue to focus on the genre of realistic fiction. Students have heard, read, discussed and responded to a variety of realistic fiction texts. We are currently reviewing how to use text based details in our writing to support our answers. We'll also be focusing on self-assessing and revising our papers.

Reminder: Students should be reading for at least **30** minutes each night!
